Welcoming Environment Self-Assessment

Think about qualities that make an environment welcoming or unwelcoming. What did people say, do, have present in their environments that made you feel you belonged? List these qualities in the appropriate columns then take a look at your own environment. Check the box if you feel like your environment has this quality and write down specifically what it does to meet it. If it does not meet your criteria, use the "My Environment & Practices" column to think of an action step that would help you meet it.
